

## 1: Setting up WordPress Front-end - Theme

- 1) Open WordPress admin center. This is usually domain.com/wp-admin
- 2) Sign in using the admin credentials.
- 3) Next, visit the **Appearance » Themes** page and click on the 'Add New' button in the top right corner. We used 'Vantage' theme for the front-end of our website.

- 4) Go ahead and click on the 'Install' button.

WordPress will also display the 'Activate' and 'Live Preview' buttons.

- 5) To start using this theme on your WordPress website, click on the 'Activate' button. You've now successfully installed and activated your WordPress theme.

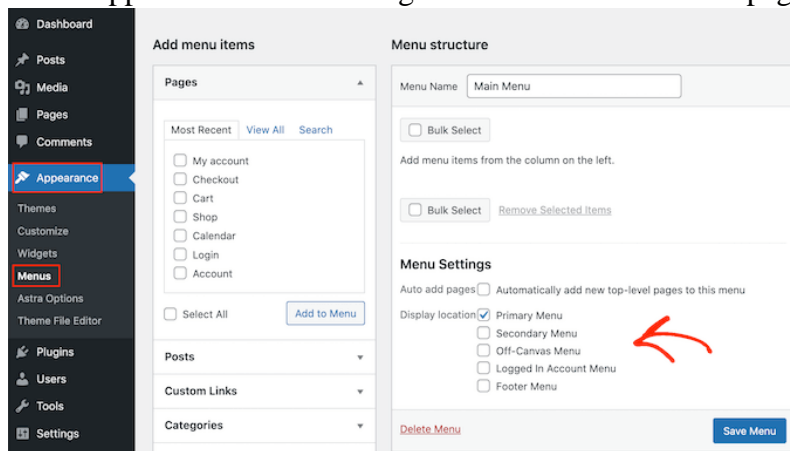

## 2: Create pages in WordPress:

To add a new page to your website, take the following steps:

1. Visit your site's dashboard.
2. Click on *Pages* on the left side.
3. Click on the “**Add new page**” button.
4. Give your page a title by typing it in the box at the top that says “*Add title*”.
5. Click on the + **block inserter** icon to add new content or click on any block to edit existing content (learn how to use the [WordPress editor here!](#))
6. Once done click ‘Publish’ and this will publish your page for you.

## 3: Modifying the Navigation Menu

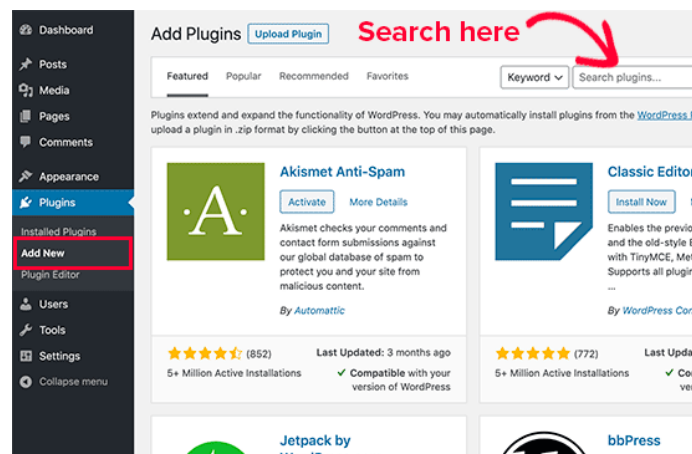

1. Click Appearance » Menus to get the Menu modification page.

2. Add pages to the menu as required, use drag and drop to adjust the order of the menu items and click ‘Save Menu’ once complete.

## 4: Create Login Page using Plugin:

1. visit the **Plugins » Add New** page inside your WordPress admin centre.

2. Download 'User Profile Builder – Beautiful User Registration Forms, User Profiles & User Role Editor' by Cozmoslabs

3. Once the plugin has installed click 'Activate'
4. Follow through with the prompts to setup the plugin.
5. You will need to add the Login and Register page to the navigation menu using the steps in Section 3.
